

BIO-ENERGETIC-LPG-SAVER

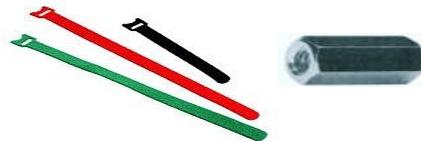

Item. No. 1250

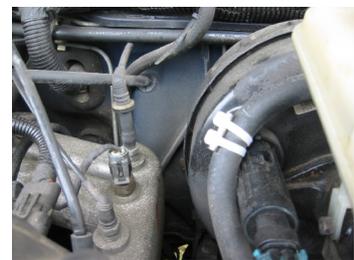

by **N-G**
New-Generation.

Simply install the BIO-ENERGETIC-LPG-SAVER with a cable tie anywhere on a thin part of LPG line (see pic 1, 2, and 3). You can use it with all kind of burning engines (LPG). Now, you can save LPG and help our environment !

Please keep track of your milage and gas consumption over an extended period of time because driving habits and weather vary from day to day

Save 10%

Important !

1. The BIO Energetic LPG Saver will change the molecular structure of your LPG so that it burns more efficiently and cleaner. It can reduce LPG consumption (Customer experience 10%) and exhaust gases .

2. Important! The BE effect is decreased or completely nullified if the LPG saver is removed, damaged or manipulated in any way other than recommended by the manufacturer.

3. Fluctuations in LPG savings and exhaust gases are possible depending upon climate conditions, individual driving differences, types of vehicles and brands of gasoline/LPG.

4. The BIO Energetic LPG Saver is suitable for all LPG burning engines. However, it must be installed correctly with good contact to the LPG line.

5. Although the BIO Energetic LPG Saver is safe for all LPG burning vehicles. We recommend that you contact your vehicle manufacturer before installation to insure that you are not voiding any warranties by installing the LPG Saver. Some Car electronics have problems with the reduced exhaust gases by the LPG saver and the board computer displays error. In such cases you can not use the LPG saver.

The BIO Energetic LPG Saver manufacturer and distributors are not responsible and can not be held liable for any use of the BIO Energetic LPG Saver that is not specifically recommended by New Generation BIO Herbert Renner.
